

WEEKLY GAMING MACHINE PROFITS REPORT

Corporate Society Name:		Venue Name:	
Jackpot Installed (Y/N):	If (Y), Make & Type:	Sheet No: () Of ()	
Date: From / / to / /	Person Completing Form:		

Note 1: Refer to Game Rule 126. Use this report to calculate GMP to be banked only if the EMS Weekly Venue Activity (Venue or Society Level) report is not accessible or EMS GMP data is otherwise unable to be obtained by the last day before banking is due.

Note 2: If it is an estimate, clearly endorse the report "ESTIMATED". There is no need to attempt to estimate the GMP for each individual gaming machine separately - use the total (venue) amount from preceding weekly reports.

Note 3: Use soft (QCOM) meter increases for GMP calculation.

Note 4: Start of week (opening) readings should be established from the gross meter values for turnover, wins and jackpot wins from the **EMS Daily GM Meter Totals Snapshot** report for the last business day of the previous week (i.e. ending at 2 a.m. on Monday morning). Closing ("end of week") readings should ideally be established from the same report for the final day of the weekly period.

Note 5: Jackpot wins paid via each gaming machine must be included whatever type of jackpot system used. They can be established from **EMS Daily Jackpot Data** reports or Daily Jackpot Cancelled Credit Reports for non-downloadable systems (i.e. Fortune, Mikhon, Translux) For downloadable types, use **EMS Daily GM Meter Totals Snapshot** reports referred to in (4) above, aggregating the net *daily* Jackpot Wins (D) for each machine for the week. Alternatively, and if there are any daily reports also missing, you will need to access the history report from the jackpot controller.
